The Future in Motion

Reasons to Choose

Extensive portfolio of stock line items

We stock over 190,000 line items of active, passive and electromechanical components, and we also have additional 16 million items available, all of which can be held 'on schedule' and delivered in accordance with your order production schedule.

Specialists in sourcing hard-to-find electronic components

Since 1994, we have made our name in sourcing quantities of obsolete, long lead time, shortage and hard-to-find electronic components. If your requirement is more difficult than normal to procure, you can count on us to go 'the extra mile' and find the parts you need.

Highly trained staff

Our highly-trained staff utilizes our global network to search for the components long after others have given up and if all else fails we work to find appropriate alternatives, which can be cross-referenced from our extensive technical data library.

One-Year Quality Guarantee

Expert sourcing through our global, quality assured offices gives full traceability to ISO 9001:2008 compliant standards. This combined with outsourcing testing services from x-ray to full functional testing and the Lantek Corporation Quality Guarantee allows you to buy with complete confidence.

Delivery Guarantee

When you place your order, you are given a firm dispatch date as well as access to our online tracking system, so you can monitor the status of your delivery.

Tailored scheduling service

By scheduling out the right stock at the right time, we can help streamline your supply chain and cash flow while allowing you to focus on your key skills. It's a stress-free service that will increase the efficiency of your production lines!

*This is by no means an exhaustive list but it gives an indication of the many manufacturer's we hold.

Electronic Component Stocking Distributor

- Stockist of Active, Passive and Electro-Mechanical components
- Specialists in hard to find, obsolete and end of life components
- Nearly 1 Billion components in stock (863,320,922 to be precise)
- Scheduled ordering
- 1 Year Money Back Quality Guarantee
- 14 million line items are also available from our worldwide partners
- 24/7 online services for all stock checking

Internal Inspection Process

A strict set of procedures and techniques for the authentication of electronic components.

Visual component inspection includes body and lead inspection, marking permanency tests, digital micrometer measuring and high resolution photographs.

Working to ISO9001 standard allows us to continually monitor and manage quality across all processes and operations ensuring consistent and efficient performance and service.

External Testing Procedure

Aside from our internal testing facilities, we also have partnerships with a number of external testing houses. Depending on your requirements and the type of product being purchased, we can offer the following inspection and testing techniques through our external partners:

Inspection and Testing Services

- External Visual Inspection
- Dimension Verification
- High-magnification Inspection
- Marking Permanency Testing
- Material Analysis (XRF)
- Endurance Testing
- Extreme Temperature Testing
- Curve Trace testing
- Solderability Testing
- X-Ray Testing
- Decapsulation
- Scanning Acoustic Microscopy
- Electrical Testing
- Analysis and Investigation
- Parametric testing (Key Function Testing)
- Flash memory test/Memory Programming

We also provide some of these processes as an in-house service, such as decapsulation and dimension verification.

Value-Added Services

- Baking
- Tape and Reeling
- Dry Pack
- Lead Formation and Crimping

Website Features

Fast Component Search

Live stock can be checked 24/7 giving access to 190,232 stocked line items and 14M parts worldwide.

Lantek Corporation has 190,232 line items in stock that are available for next-day shipping. Search today.

Component Search

Industry News

The Industry News Blog keeps you up to date with allocation, counterfeit and obsolescence issues as well as general industry updates.

Valuable Guides and Videos

The website contains downloads to support with allocation issues, stocklists, line cards, lead time tables and industry news.

Members Area

- View quotes and order history
- Manage current orders and access updates on progress and status
- Utilise the repeat ordering facility

Excess Inventory Management

- Excess Electronic Component Management Services
- Fast Evaluation of your Excess, EOL, Obsolete & Surplus Inventory
- Outright Purchase or Part/Full Consignment Selling Options
- Instant cash for your stock
- Stock removal including all packaging and transportation costs
- Complete confidentiality for peace of mind

Techflex Sleeving

Lantek Corporation is an authorized distributor of Techflex's braided sleeving products.

Since 1965, Techflex has been designing, engineering and manufacturing a variety of braided sleeving products for a variety of industries.

The company's experience in providing protective solutions for diverse applications, ranging biomedical through to automotive and everything between, has made the company the go-to name in cable, wiring and braided sleeving solutions.

What Our Customers Say

"Honest prices, professional and courteous communications and on-time deliveries, which in our line of manufacturing is extremely important."

Touch Systems

"I can't say enough about Lantek's customer service. Our account manager always gets back to us in a timely manner with quotes and updates and they always try to help in any way possible."

CSRA Inc

"Many suppliers give you commitments, while Lantek Corporation holds true to theirs. Dependable, trustworthy, reliable...those standards are shown in everything they do."

Autocar Trucks

"It has been a pleasure to work with Lantek on our projects. Our account manager always responds quickly and efficiently to our RFQs and always tries to resolve our sourcing issues.."

Electrónica Falcón

"My organization has obtained more value partnering with Lantek to supply us with our electronic components than we have achieved by working with larger online electronic distributors."

HLS Hard-Line Solutions

"Making use of Lantek allows us to focus on other areas of the business - We can only give Lantek and their team our best and most sincere recommendations."
