

Supplying for Tomorrow, **Today...**

ROHS STATEMENT

EU and UK RoHS Directives

The EU Delegated Directive 2015/863, (commonly known as “RoHS 3”), amending Annex II of Directive 2011/65/EU on the Restriction of the use of certain Hazardous Substances (“RoHS 2”); targets electrical and electronic equipment to avoid adverse impacts on human health and the environment.

The equivalent UK legislation is the Restriction of the use of Certain Hazardous Substances in Electrical and Electronic Equipment Regulations 2012 (as amended) that covers Great Britain and Northern Ireland.

Lantek Corporation (Lantek) is aware of and supports the RoHS directives and as an electronic component stocking distributor, is unable to make any claims of the material content of the product(s) that another company manufactures.

Lantek distributes a wide selection of electronic components, including both RoHS and non-RoHS compliant products. When selecting electronic components, customers should check their requirements and the compliance of individual parts directly with the component manufacturer.

Where possible, Lantek will display the RoHS status on quotes, delivery notes and invoices. RoHS status information is based solely on information provided to Lantek by the manufacturer, manufacturers' distributor or via our supply chain. Lantek is not responsible for the accuracy of this information.

“RoHS 3” is a partner directive to the Waste in Electrical and Electronic Equipment (WEEE) Directive that controls the disposal and recycling of electrical and electronic equipment.

For additional information regarding the RoHS and WEEE Directives, please visit the European Commission's website: https://ec.europa.eu/environment/waste/rohs_eee/index_en.htm and the UK Government site: <https://www.gov.uk/government/publications/restriction-of-hazardous-substances-rohs-regulations/restriction-of-the-use-of-certain-hazardous-substances-in-electrical-and-electronic-equipment-regulations-2012-as-amended-great-britain>
